Decisions*

February 11, 2008

**Community Center
100 Union Pacific Drive
Onaga, Kansas**

**Kansas State University
Department of Agricultural Economics**

MEET THE SPEAKERS

Terry Kastens

Terry Kastens thrives on crunching numbers in innovative ways for the purpose of making more profitable farm management and investment decisions. He routinely works in areas of marketing, precision agriculture, machinery management, soil fertility management, no-till economics, and most importantly, land ownership and leasing. He is especially intrigued by thinking about the future and how farm managers, agribusinesses, and investors can gain from the wisdom of their forbearers yet think differently to position themselves for a profitable future in production agriculture.

Michael Woolverton

Michael Woolverton received his Ph.D. from the University of Missouri-Columbia in 1978. He specializes in grain marketing, international trade policy, and extension outreach. His research includes structure and performance of the grain and oilseed marketing system, overseas market development and commodity promotion, and risk management in marketing and purchasing grain and oilseed commodities. He teaches a Masters of Agribusiness distance education course - International Agribusiness Trade Policy.

Troy Dumler

As an Extension Agricultural Economist in southwest Kansas, Troy Dumler conducts applied research and educational programs that encompass many crop and livestock topics. His recent research interests include the economic evaluation of dryland and irrigated cropping systems, and the economic impact of U.S. farm program payments on Kansas farms.

Kevin Dhuyvetter

Kevin Dhuyvetter assists farmers, landowners, and others throughout Kansas with risk and return assessment of alternative crop and livestock production and marketing systems. He works extensively with land-related issues such as buying and leasing land. Current research and extension efforts are examining relationships between energy prices and crop inputs, estimating crop yield and fertilizer and water relationships, economics of no-tillage, the economics of grazing systems, and factors affecting feeder cattle basis. One of Kevin's trademarks is his development of decision tools that can be used by clientele for helping them with the myriad of decisions they face in their operations.
