# MEET THE SPEAKERS

## Troy Dumler

Troy Dumler is a K-State Extension Agricultural Economist in southwest Kansas. A native of Kansas with B.S. and M.S. degrees in agricultural economics from Kansas State University, Troy has developed an Extension program centered on farm management and agricultural policy. Recently he has focused much of his attention on the 2008 Farm Bill, including working with farm organizations, government agencies, and Congressional offices to analyze how the new bill will impact farmers and ranchers.

## Bryan Schurle

Bryan Schurle has taught numerous courses in the undergraduate program, the graduate program and the Masters of Agribusiness program including introductory courses, computer courses, quantitative courses, agricultural finance and farm management. He is currently developing extension programs in transition planning and financial management for producers. His research program has revolved around risk issues for agriculture producers.

## Kevin Dhuyvetter

Kevin Dhuyvetter assists farmers, landowners, and others throughout Kansas with risk and return assessment of alternative crop and livestock production and marketing systems. He works extensively with land-related issues such as buying and leasing land. Current research and extension efforts are examining relationships between energy prices and crop inputs, estimating crop yield and fertilizer and water relationships, economics of no-tillage, the economics of grazing systems, and factors affecting feeder cattle prices and basis. One of Kevin's trademarks is his development of decision tools that can be used by clientele for helping them with the myriad of decisions they face in their operations.
