K A N S A S FARM MANAGEMENT HANDBOOK

Department of
Agricultural Economics
Research & Extension
Kansas State University

Here's What You Will Receive

A high quality vinyl ring binder with a complete set of all current management guides.

Nine sections, including financial management, labor, budgeting, insurance, crops, and livestock. Over 90 guides outlining farm management information.

For the following two years, you will receive revised guides as they are published.

Management is a challenging process of constantly making decisions in a changing environment. The quality of the decision you make depends greatly on the type of information on which you base them. To help Kansas farmers and ranchers come to grips with these decisions, K-State agricultural economists have developed the Kansas Farm Management Handbook.

Cost-return budgets for 48 different crop enterprises and 22 major livestock operations allow you to analyze the various phases of your business operation. Using these budgets, you can compare estimated returns for, say, growing corn versus grain sorghum on your farm, or compare beef cattle enterprises with hog operations. Projected cash flows can be prepared.

These guides organize the information you need to make sound decisions. It sets the state for a business like approach to management. Recognizing that costs of production are ever-changing, agricultural economists revise these guides each year. New guides are developed when needed.

This valuable handbook is filled with current information you can use for making those important management decisions. A number of K-State guides are crop and livestock cost-return budgets you can use for farm planning.

Order your copy of the K-State Farm Management Handbook today! Yes!

Here's my order for the K-State Farm Management Handbook. Enclosed is my check or money order for \$75.00 payable to "Kansas State University"
