

# Historical and Projected Kansas Feedlot Net Returns

Glynn Tonsor ([gtonsor@ksu.edu](mailto:gtonsor@ksu.edu))

Kansas State University Department of Agricultural Economics – April 2018

This article presents estimated net returns of cattle finishing operations as of April 12, 2018. The calculation and projection process was updated in July of 2012.<sup>1</sup> **This process reflects a cash market situation without price risk management strategies being implemented.** Each month updates are made to reflect the most recent feedlot closeout estimates and to reflect current market conditions.

## Close-out Calculations

The most recent *Focus on Feedlots* survey provides information on lots closed out in February of 2018. As shown in figures 1 and 2, steers and heifers were estimated to be sold in February at +\$100.50/hd and +\$130.39/hd, respectively.

## Projected Returns

Given the one-month lag in *Focus on Feedlots* survey information, market information is available for March of 2018 but realized animal performance data are not yet available. Currently, the net returns projected for closeouts in March are +\$41.54/hd and +\$59.56/hd for steers and heifers, respectively (tables 1 and 2). Tables 1 and 2 also present projected net returns for closeouts over the next nine months based on forecasts of both animal performance and market prices. Current projections indicate losses spanning the rest of 2018 consistent with lower expected sales prices, which have decline by \$8-\$12/cwt (depending on closeout month) since early March. These tables also include the projected and breakeven values for cattle prices and cost of gain which provide further insight into the sensitivity underlying these projections. Anecdotally some producers likely have lower cost of gain situations. **Producers are encouraged to carefully compare their own costs and prices with those reported here.** Finally, historical and breakeven values are provided in chart format revealing trends over time in fed cattle sales prices (figures 3 and 4), cost of gain (figures 5 and 6), and feeder cattle purchase prices (figures 7 and 8).

<sup>1</sup> A document describing the specific approach taken in these calculations and projections is available at: <http://www.agmanager.info/livestock/marketing/outlook/newsletters/FinishingReturns/default.asp>.
