Beef & Cattle Market Outlook

Glynn Tonsor

Dept. of Agricultural Economics, Kansas State University

Economic Outlook Overview: Cow-Calf

- Continued beneficiary of tight supplies and expanded heifer retention...
 - What expected return is needed for expansion?
- Returns over cash costs may set historic records
- 2013 or 2014 may prove to be “peak return year”

Economic Outlook Overview :

Stockers

- Continued sophistication of this segment
 - “cheap corn days” are unlikely to return
- Expected margins have been squeezed by run on calves
 - Historically strong basis on calves...
- Easiest segment to “start and stop” so “sitting tight” may be prudent at times...
 - Flexibility in what type/weight class is purchased appears important currently...

Economic Outlook Overview :

Feedlots

- Excess capacity and packer margin concerns will remain an issue
- Growing relevance of premiums and diversity across operations
- Probable losses for the year, but markets suggest potential improvement over 2011

Economic Outlook Overview :

Demand

- Meat prices rising within household basket of purchases...
- Beef demand has surprised analysts...
- Bullish aspects of export success and prospects...

Policy/Regulation Issues & Trends

- GIPSA “fair market” proposed rules / “anti-competition” listening sessions ...
 - Ultimately little action w/r/t beef cattle industry
 - **BUT** lots of wasted time & energy...
- Environmental regulation concerns
- WTO MCOOL ruling – U.S. response?
- Animal welfare - mandatory labeling?
 - *Is overall uncertainty holding back investment throughout supply chain???*

Looking Beyond Today's Ps & Qs

Beef industry changes underway

- Growth of stocker segment
 - Larger operations least likely to exit already are retaining ownership more...
 - Association with public grazing, value of gain, etc. makes this trend likely to continue...
- Reduced farmer-feeders (2010 vs 2009)
 - <1,000 hd yards; reduced total capacity by 150,000 hd (5,000 operations exited)
 - >50,000 hd yards; increased total capacity by 370,000 hd (4 more operations)
 - w/ +/- 20% feedlot over-capacity, will '11 be different ???

Demand Side Issues & Trends

- Long run decline in domestic overall meat consumption
 - Retail price impacts of shrinking beef supplies remain ...
- Global growth likely to exceed domestic
 - Heightens industry fragmentation issues such as animal ID/traceability, marketing arrangements, ...
 - Non-price factors increasingly important for beef...
 - Prevalence of E-coli vs. irradiation acceptance
 - Incomes, convenience, health information, recalls matter...

Recent Events / Possible Discussion Points

- Japan may start accepting older cattle...
- FTA = reduction of S.Korea tariffs
- USMEF – ID/Traceability study == U.S. falling behind

July '11: 40% of Beef Cows in States with > 40%
Poor to Very Poor Pasture Conditions (was 4% in 2010)...

U.S. Drought Monitor

September 13, 2011
Valid 8 a.m. EDT

Intensity:

- D0 Abnormally Dry
- D1 Drought - Moderate
- D2 Drought - Severe
- D3 Drought - Extreme
- D4 Drought - Exceptional

Drought Impact Types:

- ~ Delineates dominant impacts
- A = Agricultural (crops, pastures, grasslands)
- H = Hydrological (water)

The Drought Monitor focuses on broad-scale conditions.
Local conditions may vary. See accompanying text summary
for forecast statements.
