

Historical and Projected Kansas Feedlot Net Returns

Glynn Tonsor (gtonsor@ksu.edu)

Kansas State University Department of Agricultural Economics – November 2023

This article presents estimated net returns of cattle finishing operations as of November 10, 2023. The calculation and projection process was updated in July of 2012.¹ **This process reflects a cash market situation without price risk management strategies being implemented.** Each month updates are made to reflect the most recent feedlot closeout estimates and to reflect current market conditions.

Close-out Calculations

The most recent *Focus on Feedlots* survey provides information on lots closed out in September of 2023. As shown in figures 1 and 2, steers and heifers were estimated to be sold in September at +\$183.81/hd and +\$161.86/hd, respectively.

Projected Returns

Given the one-month lag in *Focus on Feedlots* survey information, market information is available for October of 2023 but realized animal performance data are not yet available. Currently, the net returns projected for closeouts in October are +\$177.54/hd and +\$155.95/hd for steers and heifers, respectively (tables 1 and 2). Tables 1 and 2 also present projected net returns for closeouts over the next nine months based on forecasts of both animal performance and market prices. Current projections are for positive net returns through November; projections have declined notably given markedly lower expected fed cattle sales prices compared to last month's projections. Included tables also include the projected and breakeven values for cattle prices and cost of gain, which provides further insight into the sensitivity underlying these projections. Producers are encouraged to carefully compare their own costs and prices with those reported here. Finally, historical and breakeven values are provided in chart format revealing trends over time in fed cattle sales prices (figures 3 and 4), cost of gain (figures 5 and 6), and feeder cattle purchase prices (figures 7 and 8).

¹ A document describing the specific approach taken in these calculations and projections is available at: <http://www.agmanager.info/livestock-meat/cattle-finishing-historical-and-projected-returns/detail-procedures-estimating-fed>.
